

the project

KEYCOACH is a two years project (October 2013 - September 2015) under the Lifelong Learning Programme aiming to provide VET tutors and mentors with the required abilities and knowledge so as to coach their students in acquiring, developing, maintaining and growing their soft skills, transversal key competences and entrepreneurship skills.

Transversal key competences become increasingly important in view of evolving labour market but are less systematically addressed by most VET systems than they are by general education. In part this challenge relates to the education of VET teachers and trainers.

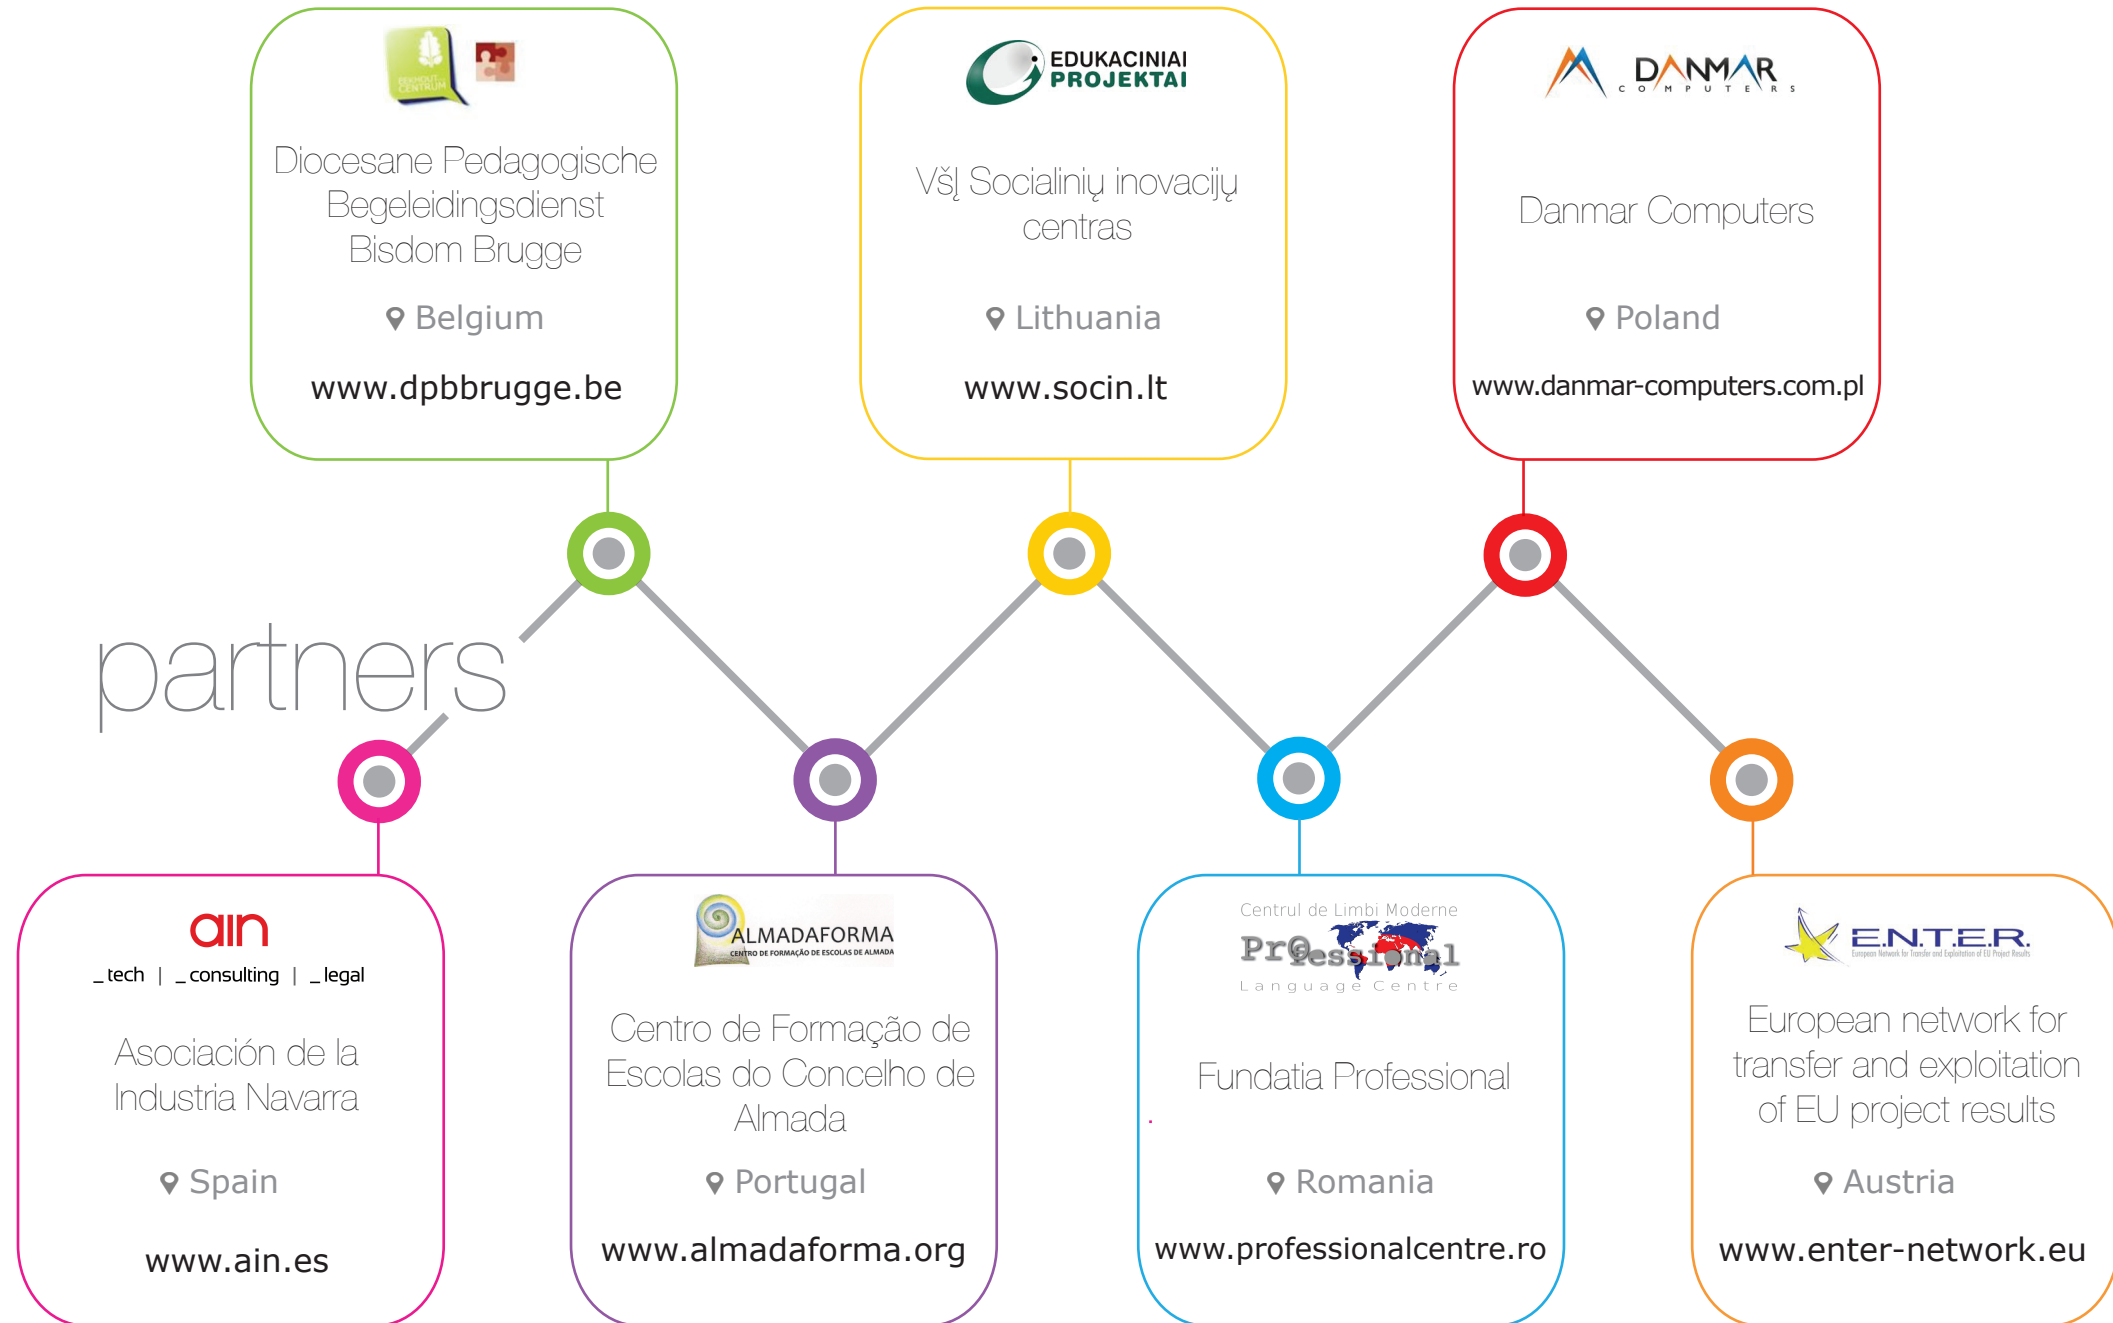

The KEYCOACH project directly addresses this issue as its overall aim is to provide VET tutors and mentors with the required abilities and knowledge so as to coach their students in acquiring, developing, maintaining and growing the soft skills related to transversal key competences.

Objectives

The major objectives that should be reached by the KEYCOACH project are:

- Adaptation, re-arrangement, translation and digitalization of an existing training programme
- Training of tutors and mentors in coaching techniques and promoting the implementation
- Creation of a Training Programme tailored to the identified needs of five different countries and provided on an open and self-learning tool, based upon the use of ICT

partners

Expected impact

The expected impact of the KEYCOACH project will concern the following points:

- Acquisition by VET teachers trained with the Training Programme of the skills needed to foster their students' transversal key competences
- Improvement of quality and of innovativeness of the VET system
- Awareness raising at the EU level for the need of training VET teachers in fostering transversal key competences

Target groups

The main target group of the KEYCOACH project profiting directly from the project are:

- VET tutors or mentors
- VET students

Beside these, also the following groups will profit from the KEYCOACH results:

- VET teachers associations and unions
- Regional administrations
- Schools
- VET providers and teachers education providers
- Local bodies for VET teachers' education and training
- EU citizens in general

AIN ha desarrollado un " Modelo de aplicación del coaching en el ámbito educativo" y lo ha aplicado desde el año 2011 hasta 2014 en dos centros de formación navarros.

La experiencia de AIN ha sido reconocida con un proyecto de transferencia de su metodología a otros 6 países: KEYCOACH encaminado a conseguir el mayor éxito y desarrollo posible del alumnado de F.P.

El coaching refuerza las habilidades de los estudiantes, activa su potencial , incrementa la responsabilidad propia y logra que sean conscientes de sus propios recursos.

Dichas capacidades les serán de gran ayuda no solo en el desempeño de su futuro profesional, sino también en su desarrollo personal .

El producto/resultado final consistirá en un curso de coaching para tutores/as de F.P. en modalidad on-line y de autoaprendizaje, basado en el uso de las nuevas tecnologías.
